NodeWar
   for Jungle Suite

Comments

3
- comments are okay but missing from some
- some sections could use more explanation

Style

4
- code is cleanly formatted
- good spacing

robustness

4
- all the code works → everything is solid
   ↳ toString() helpful

readme

2.5
- not enough explanation as to why they implemented the specific
function
- You could've added more to explanation → code works, but I don't
understand why.
